

Blitz

There's a new gardener at home: precise, untiring, noiseless, cheap and smart.

It's called Blitz and it's the last generation robot which works autonomously giving you a lawn as perfect and smooth as a golf course. It doesn't need even the installation: it recognises the grassy surface thanks to its sensors that detect the land underneath, changing direction by itself.

Wiper Blitz is the best choice for small and medium gardens, everyone can safely use it due to its extremely ease of use and program.

It needs just a click on the display and all done, Wiper Blitz works during the day and during the night in silence, producing just a minimum noise and managing slopes of up to 25°, without losing speed and power, and in particular without any overturning risk; it doesn't need human intervention due to its sensors that detect any obstacles autonomously.

Thanks to its compact dimension and weight and to the useful handles it can be carried easily to everybody.

Even the recharge doesn't represent a problem: the only thing you have to do is connect the two connectors supplied with the robot, we advise you to do this operation in dry place keep out of sun irradiation.

In a short time Wiper Blitz Hi-Tech Batteries will be recharged and the robot will be ready for a new perfect cut of the garden. Thanks to its bump sensor and the sophisticated disposal which guarantees the immediate stops of the machine in case of uplift or overturning, Wiper Blitz ensure the complete safety also for children and animals which are moving on the grassy surface.

Last but not least Wiper Blitz is also cheap and eco-friendly: an extremely affordable price, the robot is powered with rechargeable batteries and the grass is transformed into a natural fertilizer for your garden.

MODEL	CODE	BATTERIES	CUT	S.M.	SLOPE
Blitz	20-4010-10	1X6Amp - Lithium	25 cm	400 sqm	50%
Manual recharge - blade modulation - grass detection sensor - lifting sensor - anti-tilting sensor - grass sensor - cutting height 34mm/40mm					
Blitz XE DROP OFF SENSOR	20-4020-10	1X6AMP - Lithium	25 cm	400 sqm	50%
Manual recharge - blade modulation - grass detection sensor - lifting sensor - anti-tilting sensor - grass sensor - cutting height 34mm/40mm - drop off sensor					
Blitz XK AUTO	20-4030-10	1X6AMP - Lithium	24 cm	800 sqm	50%
Manual recharge - blade modulation - grass detection sensor - lifting sensor - anti-tilting sensor - grass sensor - cutting height 34mm/40mm - drop off sensor - auto					

!! Blitz XK available also with small battery, battery working time 50 min. instead of 3.5 h.

Double function handle:
• lift handle
• safety

Control keyboard
intuitive and easy to use

400 sqm

Drop off sensor to detect gaps

grass sensor (all models)

Drop-off sensor to detect gaps (XE and XK models)

Blitz

Blitz XE

400 sqm

Blitz XK Automatic

The evolution of Blitz X, even more lawn surface to be managed, up to 800 sqm, and it also comes with an automatic recharging function for making the robot completely autonomous.

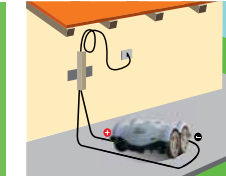

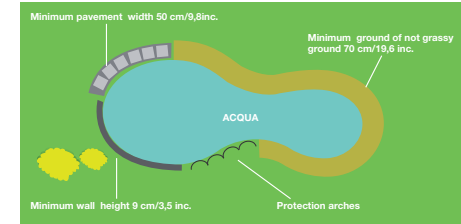

Equipped with 12 m of perimeter cable which can easily be fixed on the lawn allowing the robot to turn back to the docking station. The perfect mix for people which are searching for a versatile, powerful and ready to use lawnmower robot.

Incomparable thanks to the absolute technological evolution.

- PORTABLE
- DESIGNED FOR SURFACE TILL 800 SQM.
- AUTOMATIC RECHARGE
- CABLE FOR QUICK RETURN TO DOCKING STATION

800 sqm

Optional protective cover

Wiper Blitz mows perfectly every kind of garden and is able to change its direction as soon as the sensors detect the limits of the grassy area to be mowed, therefore it doesn't request any physical delimitations, it needs only few cares. The lawnmower works randomly, without following a precise guideline.

Whenever it bumps into an obstacle or the perimeter cable stops itself, turns back and starts again changing direction. Wiper Blitz is noiseless, waterproof, compact and extremely safety even for children and animals.

It works during the day and during the night, transforms the grass into a natural fertilizer giving to the lawn the right water supply. Wiper Blitz guarantees a perfect, optimal and personalized cut of the garden.

You just have to set up manually the desired height of the grass (it can be chosen between 34 and 40 mm) and then the four knives blade will give to your garden a regular and smooth aspect, every blade of grass will be equal to the other.

Cutting blade capacity 25 cm
