

JOY

Niko's last born, small and compact, focused on an innovative design, state of the art performances and a wide range of extra accessories that make it your Super Ally in the maintenance of lawn and green areas.

Joy is the first Niko's robot equipped with a straight blade which curves itself in connection with its movement. Thanks to its barycentre, the robots guarantees the maximum traction in every direction and ensure an optimal cut.

Its innovative design allows the robot to change direction whenever it bumps into the cable or an obstacle without compromise its aesthetic sense.
